

HAICAM · YouIPCam Handbook

The app's different alert sounds which you need to know

1. There are 4 different notification sounds in the YouIPcams mobile app

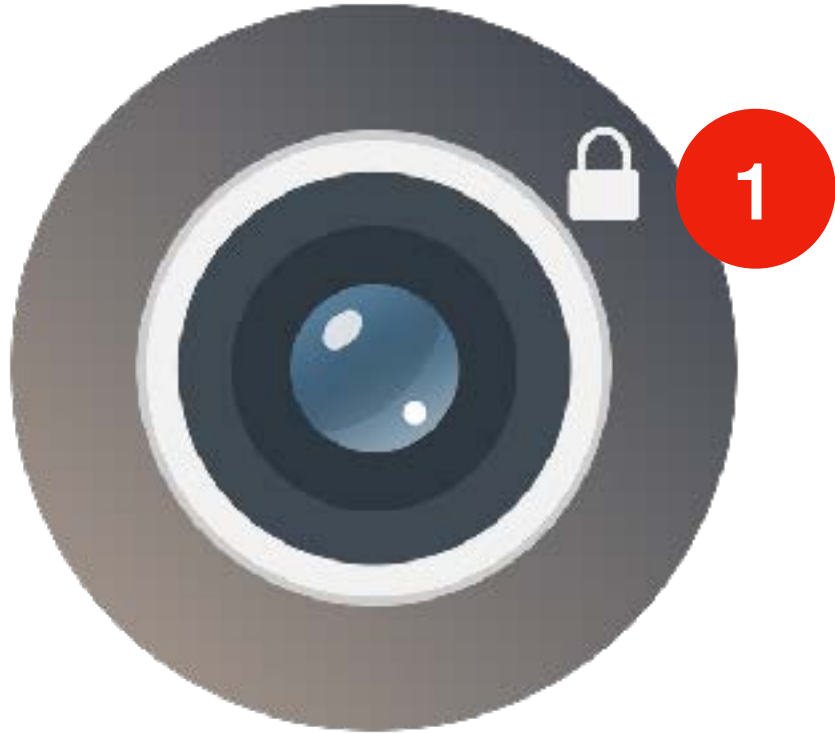

Alarm

Ring

Bell

Standard

2. When will you get the alarm notification?

- When there is a human motion detected, if you set up the security system to arm away or arm stay. Your camera and app will play the alarm sound
- "Alexa, Ask Haicam to alarm". Your camera and app will play the alarm sound
- "Hey, Google, Ask Haicam to alarm" Your camera and app will play the alarm sound
- "Alexa, Ask Haicam to send alert". Only the app will play the alarm sound
- "Hey, Google, Ask Haicam send alert" Only the app will play the alarm sound

Alarm

It is very useful to use voice to send one alert to your family members if you cannot reach your phone in some emergency cases

3. When will you get the phone ringtone notification?

- If your camera is offline, the cloud system will ring your phone to let you know
- "Alexa, Ask Haicam to find my phone"
Your phone will play the ringtone to let know where it is
- "Hey, Google, Ask Haicam to find my phone"
Your phone will play the ringtone to let know where it is

Ring

Haicam family assistant Alexa and Google home app will make your life more easier

4. When will you get the phone ringtone notification?

- "Alexa, Ask Haicam to let my Dady to call living room camera"
Your phone will play a bell ringtone to let you know
- "Hey, Ask Haicam to let my Dady to call living room camera"
Your phone will play a bell ringtone to let you know"

Bell

Your kids can use this voice to ring you, let you call back by the camera

5. When will you get the standard notification?

- The camera detects a person motion
- The camera detects a vehicle motion
- The camera detects a animal motion
